

The background of the entire image is a dark blue, textured surface that resembles marbled paper or a fine-grained fabric. The texture consists of swirling, vein-like patterns in various shades of blue, from deep navy to a slightly lighter, almost white-blue at the highlights.

High-octane glamour defines Zinc Textile's new launch. The Parisienne collection sees contemporary designs produced with century old techniques. Designed to be used in both residential and contract interiors, these fabrics are inherently fire retardant and washable. The same impressive performance applies to Jet Set, our indispensable collection of curtain weight weaves.

Ever pushing the boundaries of design, Zinc Textile presents Sheepskin. A world first, Sheepskin is made up of the softest Australian fleeces, sewn together and sold by the metre.

Elliott is a classic Zinc collection; sophisticated weaves in our signature neutral palette, are easy to use and timeless in their appeal.

As always, our new collections aspire to encourage confidence and individuality. Continue to push your own boundaries to create interiors that follow no rules.

parisienne & jet set

The Parisienne collection presents our new indispensable range of plain and decorative velvets.

A striking candy stripe and a classic chequerboard design have been realised through a traditional embossing technique.

Complementing these, is Athénée; our stunning new authentic trevira moiré. Boasting a large scale fluid design, the pattern is created by hand, ensuring each metre is unique.

Our colour palette of luxe neutrals has expanded to include rich jewel-like shades of Empress green, Cognac and Ochre.

Jet Set is a compendium of curtain weight weaves featuring a modern damask, signature Zinc geometrics and a wide width sheer.

Fire retardant and washable, these curtaining and upholstery qualities have been designed for both residential and contract use.
